

SRI SANMIKA
AUTOMATION
CUSTOMIZED MACHINERY MANUFACTURER

Customized Industrial Automatic Machine

We are manufacturer of machines like Special Purpose machine, Assembly & Process Line Automation for entire industry.

SATISFACTION | SAFETY | AESTHETIC

Sri Sanmika Automation : Who we are

Sri Sanmika Automation embarked on its journey in October 2021 in the bustling industrial hub of Coimbatore. As a registered GST and MSME company, we take pride in being pioneers in providing comprehensive industrial automation solutions. Founded by two passionate individuals, both holding Bachelor's degrees – one in Mechatronics Engineering and the other in Electronics & Instrumentation Engineering from Kumaraguru College of Technology, Coimbatore.

Our journey began during our academic years, marked by our receipt of the prestigious Best Project Award from Kumaraguru College of Technology in 2015. Leveraging our academic excellence and hands-on experience, we ventured into the industrial landscape, serving in various capacities as Design Engineers and Instrumentation Engineers over the past six years (2015-2021) in four different SPM and manufacturing companies in Coimbatore.

With a rich background in manufacturing SPM machines, we specialize in every stage of the process, from conceptualization to design and manufacturing. Our extensive experience encompasses research and development work for various SPM and industrial automation machines. Over the years, we have designed and developed approximately 40 different types of SPM and industrial assembly machines, showcasing our expertise and commitment to innovation.

What We Do:

At Sri Sanmika Automation, we are dedicated to manufacturing customized industrial automated machines tailored to meet the unique requirements of our clients. Our core offerings include:

Special Purpose Machines (SPMs):

Developed to execute specific operations for production purposes. Semi-automatic and Fully Automatic Machines: Designed and fabricated according to customer specifications.

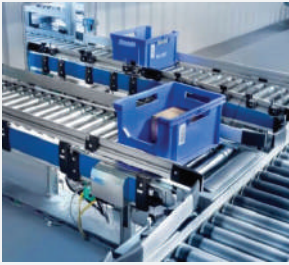

Design, Fabrication, Assembly, and Programming: All stages of machine development are meticulously carried out in-house by our skilled team, ensuring quality control and timely delivery.

Our Commitment:

At Sri Sanmika Automation, we are committed to providing innovative solutions that enhance productivity, efficiency, and safety across various industries. With a focus on customer satisfaction and continuous improvement, we strive to exceed expectations and become a trusted partner in our clients' success stories. Our dedication to excellence, coupled with our technical expertise, makes us the preferred choice for all industrial automation needs.

In conclusion, at Sri Sanmika Automation, we blend passion, expertise, and innovation to deliver cutting-edge solutions that drive progress and success for our clients. With a customer-centric approach and a relentless pursuit of excellence, we are poised to shape the future of industrial automation.

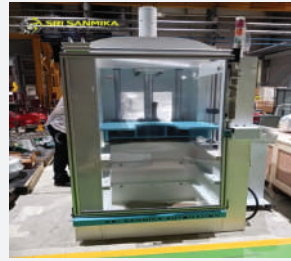

What we do

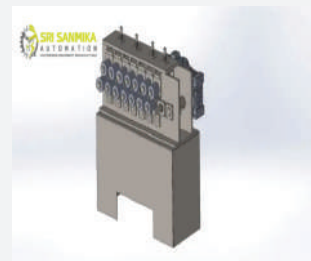

Assembly & Conveyor System

Automatic Peck Drilling SPM

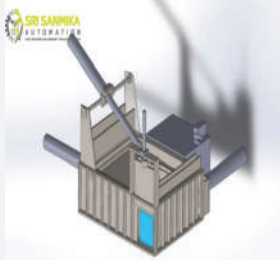

Customized Hydraulic Press

Flat Straightening Machine

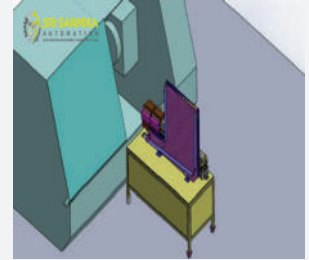

Semi-Automatic Hydraulic Fitting Pipe Bending Machine

Hydraulic Metal Scrap Baling Press

Lapping SPM

CNC Loading & Unloading Automation

Leak Testing Machine (Hydro Static Pressure Testing, Immersion Leak Test)

Fully Automatic Motor Shell Roll Forming Machine

Motor Testing Stand

Automatic Multihead drilling Machine

Recent Projects

VALVE PLUG PECK DRILLING AND PIN PRESS ASSEMBLY MACHINE

ANGLE VALVE FLANGE ASSEMBLY FIXTURE

CUSTOMIZED HYDRAULIC PRESS FOR FRONT LOADING

LAPPING PROCESS UNIT

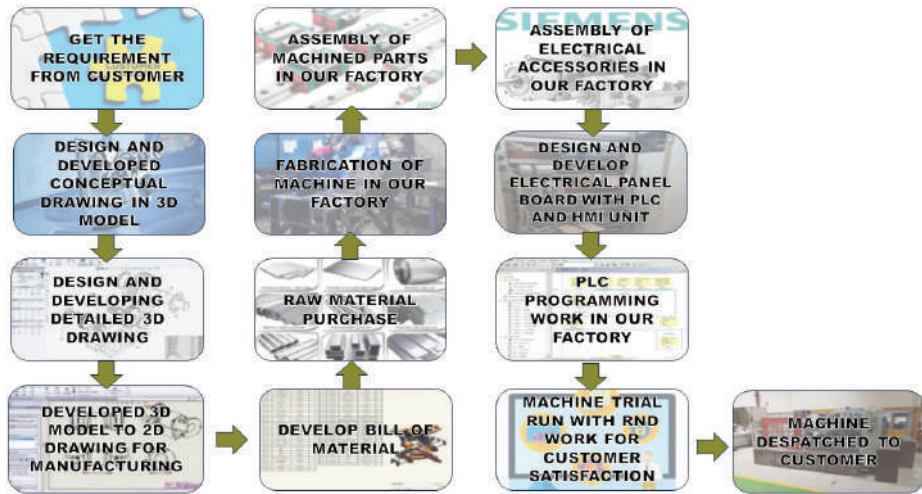

FLANGES FOR VALVE LEAKAGE TESTING PROCESS

VALVE 360° Rotation fixture for testing

Our Process Flow

Industries Served:

Valves Industries

Pumps and Motor Industries

Automotive Industries

Electrical & Electronics Industries

Textile Industries

Agri & Farm

Food Processing Industries

Plastic Processing Industries

Casting & Foundry Industries

Pharma Industry
